

## INTRAY Step Loader

### Automatic tray denesting and product loading

#### **Multi product per tray capability**

The INTRAY Step Loader is designed to automatically denest trays and gently load various product types directly into the trays. The Step Loader offers an in-line compact solution to handle high capacities due to an innovative tray handling design.

The tray handling design enables the machine to load one or multiple

products in pre-defined loading patterns in the tray.

#### **Automatic product loading**

Step Loader is the solution when you want to automatically load mince, patties, pre-sliced cuts of poultry, meat or fish safely and by step into your tray. The Step Loader is your fully automatic solution for loading products carefully and at high speeds into trays.

# Technical specifications
