

Shuttle CONVEYOR

High-Capacity Shuttle

The QUPAQ Shuttle Conveyor is a versatile solution designed to streamline packaging automation. With a capacity of up to 240 products per minute, this conveyor system offers various loading and product aligning configurations.

The QUPAQ Shuttle Conveyor is perfectly suited as a tray loading conveyor. This solution is highly usable in combination with the QUPAQ Step Conveyor.

Versatile Solution

Its retractable belt enables seamless loading of products directly into trays – this includes both single products and multi-product loading in steps.

But the QUPAQ Shuttle Conveyor can be used for many different purposes and set ups. For instance, to align products from single-lane to multi-lane operations, simply by dropping down the products with the use of the retraction belt.

Compact and Hygienic Design

The QUPAQ Shuttle Conveyor offers a small footprint, which ensures an easy integration into any existing production setups.

Its hygienic design and removable conveyor belt ensure easy cleaning, while the option for casters allows for effortless mobility or fixed positioning based on operational requirements. Available in various lengths and widths to accommodate individual needs.
